

SAMAL ISLAND MISSION

“moments travel so quick”

My wife and I will never forget the day our child came to this world six years ago because it was in that day that we received Promise lands kindness and every time we see our daughter grow in age we see How God cares for us through you our dear brethren not because of the support but on how you care and love my family.

Thank you so much for keeping us in your prayers, heart, shoulder and in your finances because without God through you may be our ministry life is harder.

March 16, my daughter blessie reaches the finishing line of her preschool days with a second honor academic award. Since last year I was the one who escorted her going up to staged so in this time my wife escorted her and we are very happy for what she came and done. After the graduation we went to davao together to celebrate blessie’s 6th birth-

day and to buy her desired request a “Bicycle”. And she really enjoy her bike. My wife also was able to depend her thesis writing and still able to reach her required grades for her academic scholarship. This coming school year 2013-2014 my wife will graduate her college degree course.

In the contrary, because of a very expensive tuition fee of our daughter (15,850.00) for grade one we decided to enroll our daughter in the Public School because we cannot afford the cost of her present school tuition fee. In Public school tuition fee is free though the quality of education is not that good compare to private school.

As a father and a husband I would like to extend my

Graduation ceremony

SPECIAL POINTS OF INTEREST:

- My License renewal is on the month of April
- Vehicle plate registration on the month of June
- Thanks to Bro. Trey, and Ptr. Michael for the extra funds for our vehicle repair “it is done”.

Missionary vehicle update

Thank you very much for all your help financially for the small parts repair of our missionary vehicle. The auto mechanic has fix the wirings, glow flag, timing belt and fabricate the big holes of our vehicle floor temporarily to prevent from the bigger corrosions and from

the water coming inside. The engine is working good now even though not in good condition because of leaks and needs for general overhauled but still safe and useful in spite of the circumstances. For your missionary he believes that in the Lord’s work even with or

without vehicles still our FEET is the very best means of transportation in doing the Lords work. The absence of the vehicle is not the hindrance of taking the gospel forward.

ATTENDACE REPORT

Church worship: 19
 Children: 13
 Children ministry: 30
 Baptismal candidate:
 Bro. Jerome & Bro. Brandon
 Outreaches: San Roque: 8
 Tagbitan-ag Vill. 4
